

INSULATION THAT PAYS YOU BACK

With energy costs expected to rise 15-30% in many areas of the country, RetroFoam™ foamed-in-place insulation will literally pay for itself by reducing your utility bills. Whether your walls are uninsulated or poorly insulated, RetroFoam™ will maximize the R-Value of your walls. R-18 in standard stud wall vs. R-13 for fiberglass batting. This reduces the amount of heat or cooling that escapes through the walls. RetroFoam™ also prevents air infiltration by sealing all wall cracks and crevices where air can enter or leave your home. All of which saves you money.

SAFE FOR THE ENVIRONMENT SAFE FOR YOUR FAMILY

Non-toxic and completely safe, RetroFoam™ produces no fumes, gases or emissions that may be created by other types of insulation products. That's good for the environment and your family.

SAFE, AFFORDABLE, EFFICIENT FOAM INSULATION FOR YOUR HOME

IMPORTANT NUMBERS TO KNOW

Great R-Value Insulator!

- **R-Values up to 18.1**
1" RetroFoam™ at 25° = R 5, at 75° = R 4.6
3.625" stud cavity 5 x 3.625 = R 18.1

Great Fire Retardant!

- **Flame Spread 25 • Smoke Developed 40**
Surface Burning Characteristics (ASTME 84)
This numerical flame spread rating is not intended to reflect hazard presented by this or any other material under actual fire conditions.

Great Sound Reducer!

- **45 - 50 db loss on average**

APPLICATION OPTIONS

Existing Stud Walls

Basement Walls

FIRE RETARDANT AND PEST RESISTANT

In addition to the superior insulation value of RetroFoam™, the product is also non-flammable (class 1 fire rating), which adds safety and value to your home. It also helps keep critters where they belong...outside. And makes you comfortable. Inside.

FAST AND EASY NO MESSY CLEANUP

Installation of RetroFoam™ foamed in place insulation is a breeze in any type of block or frame construction. Typically, installation is completed within a day. Since it can be installed from the outside, it is unintrusive...no tearing out walls, no moving furniture or interior clean up. And RetroFoam™ installation technicians will leave the outside neat and clean, too!

BETTER THAN BLOWN - IN CELLULOSE OR FIBERGLASS

Unlike blown-in cellulose or fiberglass, RetroFoam™ will not settle over time. This means that your insulation stays in place, particularly at the top of walls where it is most needed.

HOW TO GET COMFORTABLE WITH RETROFOAM™

RetroFoam™ is available through a national network of Dealer Suppliers. These dealers have been trained and certified by the manufacturer to assure that the highest standards of quality and adherence to all applicable codes and regulations have been met. That's just one more reason to feel comfortable with RetroFoam™.
